The Longfield Iris Farm

Bluffton, Indiana

1923 Supplement to 1922 Catalogue

This supplement lists the Iris we are offering for sale in 1923, all classified according to the scheme given in our catalogue. Besides indicating the general color effects of the varieties offered, the scheme will be found of value to any one making notes and records in the garden. For your convenience we are publishing the system of classification as the final section of this supplement. The number preceding the name of the variety is the symposium rating of the American Iris Society for that variety and is based on 10 as perfection. Following the name of the variety is the name of the originator, the year of introduction, the general color effect, the average height in inches and the price per plant.

During 1922 we sold a large number of our collection of 125 mixed Iris seedling plants for \$5.00. In every case the customer was more than pleased and in many cases orders were received from friends and acquaintances of the first purchaser. Moreover, during 1922 we received many letters from purchasers of former years who were enthusiastic over their plants, then coming fully into flower, and who wrote that their love of Irises began with the growing of one of our baskets of mixed seedlings. We cannot too strongly recommend these mixed seedlings for the beginner and for those who wish to plant as many or more than 125 Iris plants for their effect and are not interested in named sorts. A mixed Iris border has some real advantages over a border of one variety.

During 1922 our relations with our customers was a source of great pleasure to us. We feel that among them are many real friends, kindred spirits in the love of the Iris. Some of them we have had the privilege of meeting in person. We hope to see all these old friends again in 1923 and we invite all Iris lovers to visit our gardens at any time. We look forward in 1923 to visits by several real Iris experts to assist in studying the large number of old and new seedlings which we hope to have flower this year.

For 1923 we offer the following Irises for sale, express collect, at the prices indicated, or, if by mail, with 5 cents per plant added to the price.

THE LONGFIELD IRIS FARM.

Longfield Seedlings

9.6	Lent A. Williamson (Williamson 1916) See Catalogue page 13.	RYF	40 in.	\$5.00
7.8	Mary Williamson (Williamson 1921) See Catalogue page 15.	WFB	30 in.	5.00
	Dorothy K. Williamson (Williamson 1916) Apogon Hybrid. See Catalogue page 14.		30 in.	5.00

Unnamed Selected Seedlings.

See Catalogue page 11.

Sets of 5 numbered seedlings	\$5.00
Single numbered seedlings, each	\$2.00

Mixed Bearded Iris Seedlings.

See Catalogue page 12.

125 plants	\$5.00

THE LONGFIELD IRIS FARM.

Classification of Bearded Iris

BY PAUL H. COOK

All varieties of Pogoniris offered in this list are classified according to the following system. In this system the six principal divisions are based on the most obvious color of the flower, and the subdivisions are based on the modifying or less prominent color of the flower. The letters used to designate the various groups are: **W**(white), **Y**(yellow), **L**(lavender, or pale blue purple), **B**(blue purple), **P**(pink), and **R**(red purple), **C**(concolorous, or self colored), **M**(margin), **S**(standard), and **F**(fall) are used descriptively following the initial letter which designates the group. The last three letters, in every case following the letter designating the group, and followed in turn by an adjective which is one of the six group letters, are used in describing bicolors.

It may be seen that a brief but somewhat detailed color description may be given of any variety by taking in their descending order the letters designating the main color group and subgroup or groups within which such variety falls; for example, **WML** describes Madame Chereau as a white flower margined lavender, and **LYC** describes Dalmaris as a concolorous blend in which lavender predominates.

Group W. White.

- C.** Concolorous (Innocenza)
- M.** With colored margins
 - L.** Margined lavender (Mme Chereau)
 - B.** Margined blue purple
 - P.** Margined pink (Leda)
 - R.** Margined red purple (Francina)
- S.** With colored standards
 - L.** Colored lavender
 - B.** Colored blue purple
 - P.** Colored pink
 - R.** Colored red purple (Parisiana)
- F.** With colored falls
 - L.** Colored lavender
 - B.** Colored blue purple (Rhein Nixe)
 - P.** Colored pink
 - R.** Colored red purple (Anne Leslie)

THE LONGFIELD IRIS FARM.

Group Y. Yellow.

- C. Concolorous (Aurea)
- M. With colored margins
- S. With colored standards
- F. With colored falls
- W. Colored white
- L. Colored lavender (Darius)
- B. Colored blue purple (Loreley)
- P. Colored pink
- R. Colored red purple (Mithras)
- L. Blended with lavender
 - C. Concolorous blends
 - F. Bicolored blends (Nibelungen)
- P. Blended with pink
 - C. Concolorous blends
 - F. Bicolored blends

Group L. Lavender

- C. Concolorous (Dalmatica)
- F. Bicolored (Oriflamme)
- Y. Blended with yellow
 - C. Concolorous blends (Dalmarius)
 - F. Bicolored blends (Mme. Blanche Pion)

Group B. Blue purple

- C. Concolorous (Mary Gray)
- F. Bicolored (Othello)
- Y. Blended with yellow
 - C. Concolorous blends
 - F. Bicolored blends

Group P. Pink

- C. Concolorous (Lohengrin)
- F. Bicolored (Windham)
- Y. Blended with yellow
 - C. Concolorous blends
 - F. Bicolored blends (Her Majesty)

Group R. Red purple

- C. Concolorous (Kochii)
- F. Bicolored (Rubella)
- Y. Blended with yellow
 - C. Concolorous blends
 - F. Bicolored blends (Arnols)
